REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the present invention relates to a programming circuit for a programmable link. The independent claims 1, 11-12 recite a circuit for driving a programmable link, comprising a volatile memory having an address input and a volatile memory cell coupled to the programmable link for permanently a datum from said volatile memory cell to the programmable link, and a shift register having a register cell coupled to said volatile memory cell in a read direction and in a write direction for a data transfer between said register cell and said volatile memory cell. The PRIOR AR fails to disclose or suggest such a programming circuit for a programmable link as described in the independent claims 1 and 11-12, therefore, claims 1-12 are in condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
